

What type of files to upload

- 4d lattices ranging in size 50MB to 50GB
- LatticeQCD configurations at finite temperature generated with $2 + 1$ HISQ fermions

Configurations for upload

| Ensembles | Configurations | Tera Bytes |
|-----------|----------------|------------|
| 70 | 15Million | 1500 |

Storage Capabilities from hotQCD

- Currently no storage available through HotQCD

Things to be done

- Collect ensembles into fewer larger ILDG files
- Write Glossary for HISQ action
- Internal discussion for the future release of newer configurations
